

# VIDEOSCOPE

**DIGITAL  
MEASUREMENT**

**COST  
EFFICIENT**

**100%  
SAFE**

## APPLICATIONS

Videoscopes are used throughout the pharma and food industry. Mainly for quality control of the internal welding but also to check the hygienic state of processing equipment.

Because of the videoscopes being small and flexible in diameter, they are also perfect for in the (petro) chemical industry for pipelines and other equipment such as turbines, manifolds and small vessels.

## DIFFERENT PROBES

We have several probes with different diameters and lengths. With a diameter of at least 4.1 mm. and a length up to 30 meters, inaccessible areas can be inspected.

## BENEFITS

- Small access openings > 4mm
- High movability
- 3D measurement
- HD video and photo
- High light output

## SPECIFICATIONS

### XLG3

- Probe length: 2.5 - 30 meter
- Diameter: 4.1, 6, 8 and 9.6 mm
- Steerable tip
- Exchangeable optics
- Mobility: portable with battery

### 3D

- 3D measurement
- Point cloud images
- 0.0114 accuracy

### MENTOR VISUAL IQ

- HD images
- Probe length: 4,5 - 8 meter
- Diameter: 6 and 8 mm
- Steerable tip
- Exchangeable optics
- Mobility: portable with battery
